

Welder Repair Technician

We are currently seeking highly motivated individuals with thorough working knowledge of machine maintenance practices and techniques for a Welder Repair Technician.

Requirements:

- Trouble-shooting and repair of automated and robotic production welding and assembly machines.
- Perform regular preventive maintenance (PM) on machines, equipment and plant facilities.
- Maintain and modify weld schedules for both resistance spot welding and MIG welding.
- Read and interpret electrical and mechanical prints, as well as wiring schematics.
- Troubleshoot electrical, mechanical, pneumatic, and hydraulic circuits.
- Weld fixture gauging.
- Building maintenance as required.
- Machining, welding, and fabricate as required.
- Communicate efficiently and effectively within all facets of the company.
- Experience with Fanuc robots, Fanuc Servogun software, or Motoman robots a plus.

Wages commensurate with experience. We also offer a benefits package, paid holidays, and overtime. **Immediate openings for afternoon and midnight shifts only.**
